

Did Health Sector's revenue is growing during 4 years?

The chart here shows the revenue growth in health care industry during year 1 to year 4.

The mean of 4 years of revenue in health care sector is \$1,114 Billion. The Minimum revenue is of \$963 Billion and Maximum of \$1,283 Billion. The dispersion of the revenue among each years can be seen as the range value was estimated to be 319 Billions. The standard deviation (\$141 Billion) which is far less than the mean proves that the variability in the total revenue is less during these 4 years. It is evident from that the revenue of health care is increasing from each year but the revenue growth(%) until year 3 has an increasing trend after that which there is a decline in growth that is from 13% to 10%.
